

DoD 5220.22-M-Sup 1

NATIONAL INDUSTRIAL SECURITY PROGRAM

OPERATING MANUAL SUPPLEMENT

February 1995

POLICY

THE UNDER SECRETARY OF DEFENSE

WASHINGTON, D.C. 20301-2000

December 29, 1994

FOREWORD

I am pleased to promulgate this inaugural edition of the Supplement to the National Industrial Security Program Operating Manual (NISPOMSUP). It provides the enhanced security requirements, procedures, and options to the National Industrial Security Program Operating Manual (NISPOM) for:

Critical Restricted Data (RD) classified at the Secret and Top Secret levels;

Special Access Programs (SAPS) and SAP-type compartmented efforts established and approved by the Executive Branch;

Sensitive **Compartmented** Information (SCI) or other DCI SAP-type compartmented programs under the Director of Central Intelligence which protect intelligence sources and methods; and

Acquisition, Intelligence, and Operations and Support SAPS.

This Supplement is applicable to contractor facilities located within the United States, its Trust Territories and Possessions. In cases of inconsistencies between the NISPOM (baseline) and this Supplement as imposed by a Cognizant Security Agency (CSA), as defined herein, the Supplement will take precedence.

The NISPOM Supplement has been written as a menu of options. Throughout this NISPOMSUP it is understood that whenever a security option is specified for a SAP by the Government Program Security Officer (PSO), his or her authority is strictly based on the security menu of options originally approved in writing by the CSA, or designee. CSAS may delegate such responsibility for the implementation of SAP security policies and procedures. Since SAPS have varying degrees of security based on sensitivity and threat, all programs may not have the same requirements. When a security option is selected as a contract requirement, it becomes a "shall" or "will" rather than a "may" in this document. Bold and italicized print denotes contractor security requirements, except in chapter titles and paragraphs.

The Director of Central Intelligence Directives (DCIDs), which prescribe procedures for the DCI Sensitive **Compartmented** Information (SCI) or other SAP-type DCI programs also set the upper standard of security measures for programs covered by this Supplement. DCIDs may be used by any SAP program manager with approval from the CSA. Specific security measures that are above the DCIDs (noted by asterisks) shall be approved by the CSA or designee.

The provisions of this NISPOMSUP apply to all contractors participating in the administration of programs covered by this Supplement. In cases of doubt over the specific provisions, the contractor should consult the PSO prior to taking any action or expending program-related funds. In cases of extreme emergency requiring immediate attention, the action taken should protect the Government's interest and the security of the program from compromise.

This **NISPOMSUP** is intended to be a living document. Users are encouraged to submit changes through their CSA to the Executive Agent's designated representative at the following address:

Department of Defense
ODTUSD(P)PS
ATTN: Director Special Programs
The Pentagon, Room **3C285**
Washington, **D.C.** 20301-2200

This **NISPOMSUP** will be reviewed and updated as necessary, but in any case no more than one year from the date of publication.

A handwritten signature in black ink, appearing to read "Waker B. Slocombe". The signature is fluid and cursive, with a long horizontal stroke at the end.

Waker B. Slocombe
Under Secretary of Defense (Policy)

TABLE OF CONTENTS

CHAPTER 1. GENERAL PROVISIONS AND REQUIREMENTS

	<i>Page</i>
Section 1. Introduction	1-1-1
